

RFID UHF 3M Windshield Tag

The RFID UHF 3M Windshield Tag is a high-performance, tamper-proof tag designed for vehicle identification and tracking applications. It comes with strong self-adhesive backing for easy installation on the inner side of vehicle windshields. This tag is flexible, durable, and weather-resistant, ensuring reliable performance in various environmental conditions. With a read range of 8–10 meters, it offers excellent efficiency for electronic toll collection, parking management, and transport systems.

Features :

- Secure and reliable for long-term use.
- Operates effectively with a range of 8–10 meters, reader-dependent.
- Made from PVC with IP65 rating for protection against environmental factors.
- Logo printing, serial numbers, and barcodes available.
- Self-adhesive 3M mounting for quick and secure application.

Main Specifications

Electrical	Operating Frequency	840–960 MHz
	Protocol	ISO/IEC 18000-6C
	Read Distance	8–10 meters
	Chip Type	Alien Higgs-3
	Memory	512 bit
Mechanical	IP Rating	IP65
	Dimensions	30 mm × 12 mm
	Material	PVC
Environmental	Storage Temperature	-20°C to +75°C
	Operating Temperature	-10°C to +70°C
	Expected Life	5 Years
Options Available	Mounting	3M Adhesive
	Customization	Logo, Serial, Barcode Printing
Applications	–	Vehicle Tracking, Asset Tracking
