# VOYAGER XP 1472g

Durable, 2D Cordless Scanner

Designed for retail environments requiring an accurate 2D scanning solution in a durable form factor, the Voyager XP 1472g cordless scanner delivers scanning capability on traditional barcodes and digital screens – even on damaged and difficult-to-read codes.

With enhanced durability and more powerful scanning capabilities than previous models the Voyager XP 1472g scanner is the perfect option for workflows that include 1D and 2D barcode reading and require a robust and reliable solution. The Voyager XP 1472g scanner combines added durability and better scan capability at the same competitive price point as its predecessor. The scanner's extended scan distance will reach the bottom of the cart without bending and wasted time at the checkout.

Built on the platform of Honeywell's iconic Voyager series handheld scanners, the Voyager XP 1472g scanner is backward-compatible with existing Voyager accessories, reducing total cost of ownership.

Engineered to 30 drops at 1.8 m (6 ft) and 1,000 tumbles at 0.5 m (1.6 ft), the Voyager XP 1472g scanner is built to withstand busy point-of sale scanning with much better accuracy than comparable solutions.

The Voyager XP 1472g cordless scanner combines enhanced reading of poor-quality and damaged codes with durability, reducing the risk of errors and operational slowdowns and avoiding the hidden cost of warranty.
